

ALTERNATIVES TO DECLAWING WORKSHOP

When: Saturday, April 11, 2-4 pm

Where: Water House Bistro, Lake Mills

Who: Lake Mills Veterinary Clinic doctors, technicians and behaviorist, and the Humane Society of Jefferson County animal caregivers.

WOULD YOU LIKE FRIES WITH THAT???

Ten years ago, your veterinarian probably would have scheduled your new kitten for declawing at the time of the spay/neuter surgery. NOW, most veterinarians no longer recommend declawing as a routine procedure. Come to this workshop to learn new approaches in veterinary medicine to help you survive the crazy kitten phase.

You will learn how to:

- **Save your couch from your cat!**
- **Protect children from claws and teeth!**
- **Keep your curtains in one piece!**

There are dozens of things you can do to manage and train appropriate scratching behavior, without risking your cat's health.
